~~SECRET~~/NOFORN-SKEET CHANNELS ONLYPROJECT SUN STREAK (U)WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CRV Session Procedures Report (S/NF/SK)

Control Number	: 8704
Date of Session	: 20Mar87
Date of Report	: 20Mar87
Source Identifier	: 003

1. (S/NF/SK) Tasking: No change in tasking. Original tasking data sheet attached.

2. (S/NF/SK) Session: Source was informed that this session would revisit the last site that he worked (on 18 Mar 87). Session began with a movement exercise from the center of the area to a point 6 kilometers southwest (as per tasking). Source encountered difficulty in S3; he stated that he could not sketch the structure (something very unusual for this source).

3. (S/NF/SK) Summary: Structure. Massive, concrete, steel, thick, grey, open, deep, high, voluminous (AI-"height, depth--looking way down"); lip, edge, brink. Heavy construction. Dam-like; lip, edge, brink--outside here is more important than inside, idea of "containing something". Not a habitation. Isolated. S5 of "containing" produced the following concepts:

Objects - metal

Attributes - surrounding, dangerous, protective, harmful, encompassing

Subjects - shielding, holding, storing, protecting, (A/S-radiation),
Speidieren - speidieren, (A/S-contaminants)

Topics - (none)

Prior emanations of "contaminants": substance, guaranties, bad effects, effects without contact, shielding, dumping, protecting, saving, storing, sealed, isolated, "banished", containers, corrosive. "Inside containers" (cued) produced: gritty, harsh (S2,T,I), stingy, hot, abrasive, corrosive, salty, powdery, granular, yellowish, orangeish, hot, caustic, used but reuseable, government, official, military. People are occasionally present who wear shiny, protective clothing with hood and face plate along with a self-contained air supply. They are engaged in operating remote manipulating equipment, hoisting, transporting, placing and storing. Present here also are filters and self-contained supplies of air.

CLASSIFIED BY: DIA-DT
DECLASSIFY : OADR

~~SECRET~~/NOFORN-SKEET CHANNELS ONLY

The "green cloud" (see last session) produces a burning sensation; it is painful to the eyes. It is tangible--thicker than fog--but like a dry fog; like a fine aerosol.

4. (S/NF/SK) Feedback: Source informed monitor that he felt very good about today's session, based particularly on the fact that he had never before perceived a structure like the one described above, (it was new to his experience).

massive, thick concrete w/ a very strong "deep" component. It is not a habitation. Site is isolated, protected & protecting. Storage, preservation, shielding, protection, sealing, containing, and holding are important concepts to this site. Contaminants may be involved, that are caustic, corrosive, stinging, salty, powdery, harsh, gritty & hot. People are occasionally wearing shiny protect or clothing w/ hoods & faceplates & self contained breathing filters, & manipulating heavy duty hoisting equipment with the concept of remote manipulation. Texture of stuff in containers is like flour or granular sulfur.

Green cloud - burning sensation; painful to eyes; tangible - thicker than fog, but like dry fog. Can't breathe.

0916

Stuff in cloud is (H₂O/s) like a fine aerosol

[MONITOR NOTE: Some feels ~~as~~ that he is an agent has never experienced a situation like this.]
